

scan` spray lab XL

Fine scanning spray for the economic matting of small parts

- Fine spray fog thanks to the special powder valve.
- Extremely long lasting due to the minimized discharge.
- Equipped with an Eco-Precise-Nozzle for exact and saving matting of larger areas.
- Powder layer thickness < 5 µm.
- Easy application, immediate drying, fast removal.

For the homogenous matting of larger surfaces and areas we recommend:
induscan` spray (500 ml, Art.-Nr. 400 400)

For the most economic matting with the least output of powder:
scan` spraystone (200 ml, Art.-No. 500 600)

Spray Can (500 ml) Art.-Nr. 400 040
